Home - first time

1. Use empty states as an opportunity to explain the next step. I put the "+ New Project" button right underneath projects. Once the user creates a project, the button can then move to its usual position (page 3)

2. In the menu, I added in Settings, About and a link to provide Feedback to move some of the header items off the project page

Description

Lorem Ipsum is simply dummy text of the printing and typesetting industry. Lorem Ipsum has been the industry's standard dummy text ever since the 1500s, when an unknown printer took a galley of type and scrambled it to make a type specimen book. It has survived not only five centuries, but also the leap into electronic typesetting, remaining essentially unchanged. It was popularised in the 1960s with the release of Letraset sheets containing Lorem Ipsum passages, and more recently with desktop publishing software like Aldus PageMaker including versions of Lorem Ipsum.

1

Create   Cancel

Naming project

1. I changed "Submit" to "Create", since Submit sounds like the last step in a process.
   1. Right now clicking "Create" returns back to the top-level project repository, but I think the user can be navigated directly to the project they just created.

Add a dataset to begin your project
```

COLUMNS

A dataset must be uploaded first to select columns

Merge selected columns

Project page

1. I think navigational breadcrumbs (ex. Your Projects > 311 data) should be added in throughout the site so that users know where they are. From this step forward, it became unclear to me where I would be taken if I hit the back button. Breadcrumbs should provide some context,

2. I moved the actions up top since they affect the entire project. Export is a dropdown where the user can choose the format to export the project.

Project page

1. I added in a "merged" icon to indicate that this column is the result of multiple datasets.

Project page

1. Navigational breadcrumbs expand again
2. I'm not quite sure I understand the difference between "Clear Mapping" and "Delete mapping"
3. I changed the Text/Meaning link to look more like a toggle
